List of Trade Name Inert Ingredients

EPA's Office of Pesticide Programs (OPP) has developed a list of trade names for inert ingredients used pesticide products registered under FIFRA. The "Trade Name Inert Ingredient" database can be found on EPA's Public Access Web Site, www.epa.gov/opprd001/inerts.

Each entry in the trade name inert ingredient list includes the trade name, the approval status for use in pesticide formulations, and the manufacturer name. A trade name inert ingredient may be a single component, or (more commonly) a mixture of components. In order for a trade name inert ingredient to appear for an inert ingredient, the full and complete composition of the trade name ingredient must be on file with OPP or submitted in conjunction with the "Statement of Non-confidentiality" below. The public listing does not include any information related to the composition of the trade name inert ingredient which in many cases is claimed as confidential business information (CBI) under section 10 of FIFRA. Nor would the list identify the specific pesticide products in which the ingredients are included.

If you are the manufacturer of a trade name inert ingredient and wish to have your trade name inert ingredient included in the publicly-available "Trade Name Inert Ingredient" database please fill out the "Statement of Non-confidentiality" as indicated below, specifying the individual trade name inert ingredient products you wish to have included. EPA will not include on this list any trade names where the manufacturer has not consented to release.

If you would like to participate, please copy the following text into the body of an email, fill it out, and send it to the Inert Ingredient Assessment Branch (IIAB) at inertsbranch@epa.gov.

Statement of Non-confidentiality

Company Name _____

As an authorized representative of the company specified above, I assert that the company does not claim as confidential the fact that the product(s) specified below is/are used as an inert ingredient in pesticides. I understand that EPA may include the product name(s) specified below in a public listing of inert ingredients by product name and approval status. This statement does not pertain to the use of the product(s) in any specific pesticide or to the composition of the product(s), which may or may not be claimed as confidential on a case-by-case basis.

Product Name(s):

Name _____

Position _____

Date _____
