

# Agenda

- 11/17 Production Release
- 11/29 Preprod Release
  - Bulk Remote Sign
  - H135 Going Away
- Did you know?
  - Finding Generators
  - Demo!
    - Bulk Remote Sign
- Reminders/Development Updates
  - In Development
    - PPC Correction Requests
  - In Design
    - Correction Requests Enhancements
    - EPA Waste Flag (Reminder)
- User Submitted Questions
- Questions

# PCB Rule

## New Load Types

1. ArticleInContainer - will be deactivated in Production in Feb 2024 lookup table
2. ArticleNotInContainer - will be deactivated in Production in Feb 2024 lookuptable
3. BulkWaste
4. Container.
5. Transformer – new
6. HighOrLowVoltageCapacitor – new
7. ArticleContainer – new
8. OtherPcbOnly - new

# Remote Signer - Concept

- ▶ Remote Signer is our new policy that describes how industry can execute valid electronic signatures through a registered user with sufficient permissions to electronically sign manifests (AKA the “Remote Signer”)
- ▶ It provides a way for...
  - ▶ Unregistered individuals to electronically sign manifests
  - ▶ Individuals without network access to electronically sign manifests
  - ▶ Sites to initiate the electronic signature process in their own waste management software
- ▶ The unregistered user for a site can contact (**verbally or systematically**) a registered user for a site to communicate that the manifest has been signed/changed custody.
- ▶ The registered user for that site updates the manifest in the system.

# Remote Signer - Method 1

- ▶ Electronically Signing Manifests with Remote Personnel through the e-Manifest User Interface
  - ▶ Advantage: The field personnel does not need network access, just a method to communicate and authorize the Remote Signer to execute the electronic signature in e-Manifest

Unregistered field personnel

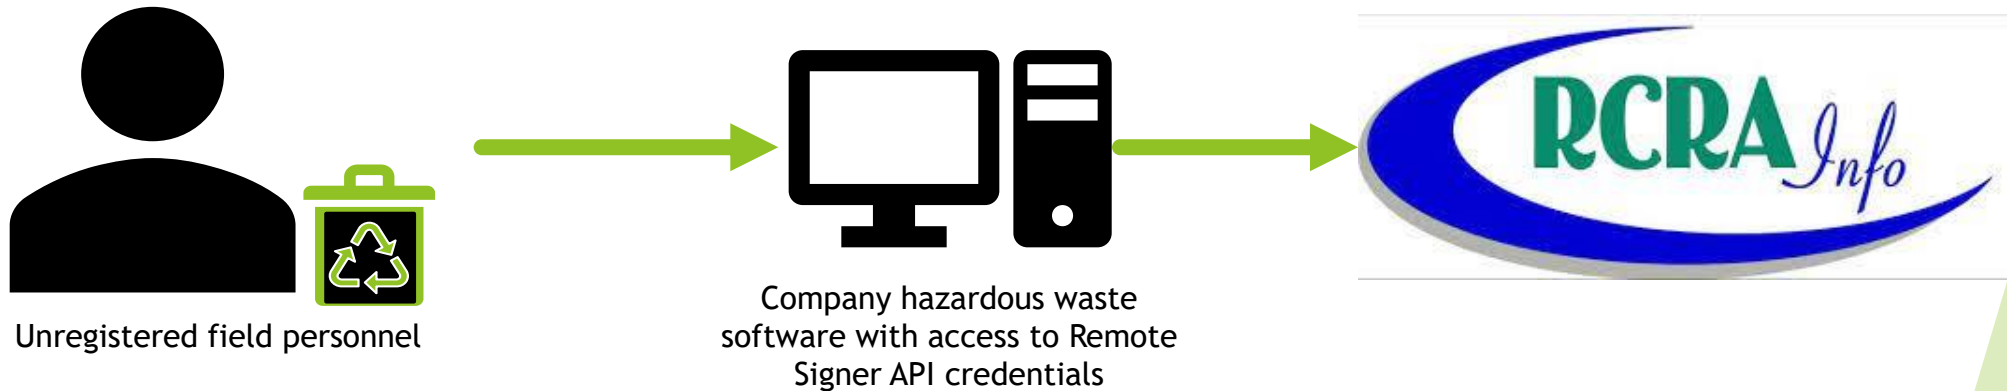

Registered Remote Signer

# Remote Signer - Method 2

- ▶ Electronically Signing using System-to-System Communication
  - ▶ Advantage: Site employee and contractors can use their waste management software and the remote signer's API ID and key to initiate the execution of electronic signatures.

# Remote Signers Draft FAQs

We'll be updating our FAQ, in general.

- ▶ Do hybrids still work?
  - ▶ Yes
- ▶ Can I use my own corporate system?
  - ▶ Yes, the remote signer needs to be registered with the handler signing the manifest, but you can use your system or a third party system
- ▶ I have a large company, do I still need to register all my drivers/ trained handlers of Hazardous Waste?
  - ▶ No, but you need at least 1.
- ▶ I have a small company with high turnover, do I still need to register all my drivers/ trained handlers of Hazardous Waste?
  - ▶ No , but you need at least 1.
- ▶ Do I still need to print a copy for the truck?
  - ▶ Yes, but you can do it on any printer that prints 8.5x11 paper. The PDF is emailable, downloadable, can even be texted and then printed.
- ▶ Could this work with rail shipments?
  - ▶ Yes
