

Agenda

- 10/18 Production Release
 - Search Service default date (updated date 1 month)
 - PDF timestamp updates to include local time
 - Label / Description updates
 - Regulators direct link to the manifest image from the dashboard
- 11/30 Preproduction Release
 - Patch services and bulk sign updates
- Did you know
 - Density and BR fields for 2025
- Upcoming Development
 - Electronic adoption enhancements in UI and API services
 - Non-TSDFs setting to Scheduled
- Electronic Manifesting Updates
 - If interested in discussing electronic manifesting, reach out to markley.kyle@epa.gov.
- User Submitted Questions
 - Please demonstrate correction requests on the dashboard and overview page
- Questions

Remote Signer Clairification

- ▶ <https://www.epa.gov/e-manifest/frequent-questions-about-e-manifest#system>
- ▶ **26. How long do remote signers have to execute an electronic signature?**
 - ▶ Remote signers have until the earlier of either (i) 24 hours from the time that their field personnel receives the waste from the preceding waste handler (i.e., generator or transporter) or (ii) before transferring the waste to another handler (i.e., another transporter or receiving facility), to execute an electronic signature to the hazardous waste manifest.
 - ▶ Example 1. A truck driver contacts their dispatcher that they received waste at 11:00 AM on a Tuesday. The remote signer has until 11:00 AM on Wednesday to execute the electronic signature.
 - ▶ Example 2. A truck driver contacts their dispatcher that they received waste at 11:00 AM on a Tuesday and will drop it with another waste hauler at 5:00 PM that same day. The remote signer has until before the transfer of custody occurs (in this case, 5:00 PM Tuesday) to execute the electronic signature.
